A parapsychologist examines how ESP works with gripping case histories from the world’s largest collection of ESP experiences

Can some people really see the future, read other peoples’ minds, or psychically observe distant events unfold, as they happen, even when they take place hundreds or even thousands of miles away from them? Yes, they can, declares clinical psychologist Dr. Sally Rhine Feather, daughter of the late, renowned ESP researcher Dr. J.B. Rhine, whose pioneering laboratory experiments at Duke University brought scientific credibility to paranormal research.

Featuring over 200 amazing, real-life ESP stories taken from the Rhine Research Center’s ever-growing database of over 14,000 ESP reports – the world’s largest collection of ESP experiences – Dr. Feather and her co-author Michael Schmicker share with the reader extraordinary psychic experiences sent in by people all over America – from avoiding injuries and accidents to predicting the death of family members; from finding stolen cars to catching cheating spouses; from winning the lottery to foreseeing the bombing of Pearl Harbor in 1941 and the 9-11 terrorist attack on America in 2001.

A 2001 national Gallup Poll found that half of all Americans believe ESP is real, and 65 million Americans have personally experienced ESP. The authors explain how scientists established the reality of ESP through laboratory experiments, the three forms of ESP – precognition, clairvoyance and telepathy – and how ESP operates in real life through dreams, intuitions and visual/auditory manifestations.

“The authors take us through some amazing anecdotal evidence of ESP...”
Fred Alan Wolf, Ph.D., physicist and American Book Award-winning author of Taking the Quantum Leap, and Parallel Universes: The Search for Other Worlds

“A wonderful book, filled with fascinating stories from the world’s largest collection of ESP cases.”
Rupert Sheldrake, Ph.D., author of Dogs That Know When Their Owners Are Coming Home And Other Unexplained Powers of Animals and The Sense of Being Stared At.

"The greatest mystery in the universe is human consciousness. These stories demonstrate that the reach of the human mind is awesome indeed. Highly recommended!"
Larry Dossey, M.D., father of mind-body medicine and New York Times bestselling author of Reinventing Medicine.

“...a collection of insights and experiences that we all may experience, but are not often shared with others.”
John Edward, author of the New York Times bestselling book, Crossing Over and One Last Time: A Psychic Medium Speaks to Those We Have Loved and Lost.

"...should be read by anyone interested in understanding the powers of the human mind...”
Joe McMoneagle, U.S. Army remote viewer in the U.S. government’s secret “psychic spy” program declassified in 1995; author of The Stargate Chronicles: Memoirs of a Psychic Spy

“Premonitions of the future, visions of remote events, and emotions of distant loved ones are not just ancient fables. They have been verified repeatedly in scientific laboratory tests.”
Dean Radin, Ph.D., author of The Conscious Universe: The Scientific Truth of Psychic Phenomena
